Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Attorneys Fraser and Furman reiterated the arguments set forth in the response of 7/14/2005, pages 7-9, that (i) the claimed polypeptides have a domain identical to PDZ10 of human MUPP1 at all but one amino acid residue, F957 of SEQ ID NO:1 and (ii) the claimed polypeptides have a domain identical to PDZ10 of rat MUPP1 (which also binds to human 5-HT2c receptors) at all but two amino acid residues, R939 and F957 of SEQ ID NO:1. Based on the high degree of homology that exists within the domain critical for function, it would be expected that the instantly claimed proteins bind to the 5-HT2c receptors .
